

## NATURE PROTECT® WORKTOP OIL

Syntilor **Nature Protect® Worktop Oil** is a genuine conditioning balm, specially designed for your wooden worktops. It nourishes and protects the wood from the repeated damage of everyday use. A green formulation with no compromise on quality.

- All types of wood
- Worktops
- For indoor use

### STEP 1

#### PREPARATION

- Old woodwork should be stripped using **Syntilor Décapant stripper** OR **Syntilor Décireur wax remover**, to ensure the wood is clean and free of stains (oil, polish and wax, old varnish, woodstain, paint, etc.), then sanded (sandpaper grade 40, 60 then 100).
- If necessary, use a suitable wood treatment product.
- New or bare wood should be finely sanded using sandpaper (120 grade). Dust thoroughly.
- For exotic or oily wood, degrease with acetone.

### STEP 2

#### APPLICATION

- Shake the container well before use.
- Apply with a brush in thin coats.
- Wipe off the excess with a cotton rag (work in the direction of the wood grain) used only for this purpose.
- Leave to dry for 2 hours then sand lightly (120 grade) before applying the next coat.
- Repeat the application, 3 coats are needed to protect the wood properly.

### STEP 3

#### MAINTENANCE

- For wood that has already been oiled with **Syntilor Nature Protect® Worktop Oil**, sand lightly with 120 grade sandpaper then apply a new, very thin coat.
- Do not apply to wood that has already been treated with traditional oil.

## TECHNICAL SPECIFICATIONS

<b>RESIN TYPE</b>	High-performance emulsified oil
<b>DENSITY</b>	1.02
<b>CONSISTENCY</b>	Fluid liquid
<b>DRYING TIME (at 20° C)</b>	Touch dry: 1 hr Between coats: 2 hrs Fully dry: 12 hrs
<b>COVERAGE</b>	20 m <sup>2</sup> per litre per coat
